- Be sure to check that the AMYPM is correctly set. (The day and date are designed to change once every 24 hours.)

 To adjust the correct time for a quartz watch, it is necessary to advance the minute hand 4 or 5 minutes ahead of the correct time and then turn it counterclockwise to set the designated time. designated time

LUMIBRITE WATCH

AFAC

If your watch is a LORUS LUMIBRITE watch, it has following features.

LORUS LUMIBRITE watches absorb and store light energy from natural and artificial light sources and emit light in the dark. They are made of environmentally friendly material, and therefore, are harmless to human beings and the

- With a full charge, LORUS LUMIBRITE watches glow in the dark hours longer than conventional luminous watches of this type. If exposed to a light of more than 500 lux (i.e., the brightness of a typical office) for approximately 10 minutes, or direct sunlight for 2 minutes, they will glow for hours.
- Since LORUS LUMIBRITE watches emit the light they store, the brightness will decrease gradually over time. The length of time they will glow may also differ slightly depending on such factors as the brightness of and distance from the light source used to charge the watch

BATTERY CHANGE

As the battery is inserted at the factory to check the function and performance of the watch, its actual life once in your possession may be less than the specified period.

Be sure to replace the battery to prevent any possible malfunction as soon as it runs down. To replace the battery, we recommend taking the watch to a local watch retailer.

■ CARE OF YOUR LORUS WATCH

• BATTERY

CAUTION

Do not expose the old battery to fire or recharge it. Keep it at a place beyond the reach of children. If a child swallows it, consult a doctor immediately.

WATER RESISTANT

No Indication	NO	NO	NO	NO
WATER RESISTANT	YES	NO	NO	NO
WATER RESISTANT* (50M/5 BAR)	YES	YES	NO	NO
WATER RESISTANT* (100M/10 BAR or above	YES	YES	YES	NO

- If your watch is 200 M/20 BAR, 100 M/10 BAR or 50 M/5 BAR water resistant, it is so indicated on the dial/case back.

 Do not press the buttons or turn the crown when the watch is wet.
- If the watch is exposed to salt water, rinse it in fresh water and then wipe it thoroughly dry

Leather straps are not water resistant except so indicated, even if the watch head is water resistant.

ALLERGIC REACTION

Because the case and band touch the skin directly, it is important to clean them regularly. If not, shirt sleeves may be stained and those with delicate skin may develop a rash. Please wear the watch with some play to avoid any possible allergic reaction. If you develop a rash on your writs, stop wearing and consult a physician on your ophysician

MAGNETISM

Your watch will not be affected by magnetism generated by household electric appliances.

SHOCKS AND VIBRATIONS

Your watch may be worn for normal sports activities, but be careful not to drop it or hit it on hard surfaces.

• TEMPERATURE

Your watch is preadjusted so that constant accuracy may be insured at normal

SERVICE

When your LORUS watch requires repair or sevicing, please see the enclosed WARRANTY/GUARANTEE.

■ HOW TO ADJUST BAND LENGTH

Sliding clasp band

- up the adjusting flap with a small ewdriver or something with a sharpened tip.
- Slide the clasp to adjust it to a desired size
- The grooves on the Back side of the bracelet should fit into the convex portion on the clasp, then, close the adjust flap.

Wrong methodIf you do this way, the adjusting flap may be destroyed.
